## Learn You a Haskell for Great Good!

- 1. <u>Introduction</u>
  - About this tutorial
  - o So what's Haskell?
  - o What you need to dive in
- 2. Starting Out
  - o Ready, set, go!
  - o Baby's first functions
  - o An intro to lists
  - o <u>Texas ranges</u>
  - o I'm a list comprehension
  - o Tuples
- 3. Types and Typeclasses
  - Believe the type
  - o <u>Type variables</u>
  - o <u>Typeclasses 101</u>
- 4. Syntax in Functions
  - o Pattern matching
  - o Guards, guards!
  - o Where!?
  - o Let it be
  - Case expressions
- 5. Recursion
  - o Hello recursion!
  - o Maximum awesome
  - o A few more recursive functions
  - o Quick, sort!
  - Thinking recursively
- 6. Higher Order Functions
  - o Curried functions
  - o Some higher-orderism is in order
  - Maps and filters
  - Lambdas
  - o Only folds and horses
  - o Function application with \$
  - Function composition
- 7. Modules
  - o Loading modules
  - o Data.List
  - o Data.Char
  - o Data.Map
  - o Data.Set
  - o Making our own modules
- 8. Making Our Own Types and Typeclasses

- o Algebraic data types intro
- o Record syntax
- o <u>Type parameters</u>
- Derived instances
- o <u>Type synonyms</u>
- o Recursive data structures
- o Typeclasses 102
- o A yes-no typeclass
- The Functor typeclass
- Kinds and some type-foo
- 9. Input and Output
  - o Hello, world!
  - o Files and streams
  - Command line arguments
  - o Randomness
  - o Bytestrings
  - o Exceptions
- 10. Functionally Solving Problems
  - o Reverse Polish notation calculator
  - o Heathrow to London
- 11. Functors, Applicative Functors and Monoids
  - Functors redux
  - Applicative functors
  - o The newtype keyword
  - o Monoids
- 12. A Fistful of Monads
  - o Getting our feet wet with Maybe
  - o The Monad type class
  - o Walk the line
  - o do notation
  - o The list monad
  - Monad laws
- 13. For a Few Monads More
  - o Writer? I hardly know her!
  - o Reader? Ugh, not this joke again.
  - Tasteful stateful computations
  - Error error on the wall
  - o Some useful monadic functions
  - Making monads
- 14. Zippers
  - o Taking a walk
  - o A trail of breadcrumbs
  - Focusing on lists
  - o A very simple file system
  - o Watch your step
